## THE TAMA TEA STORY

The three of us met at UNC Wilmington where Rocco and Wells ran track. Wells and Kelly met soon after and were instant soul mates. We each kept busy after college but were reunited by the idea to open a cafe with a tea focused menu. Drinking sparkling water and tea back to back in the cafe led to another crazy idea - let's make a sparkling tea! We did just that, craft brewing organic green tea with real fruits and herbs like lavender petals and mango chunks and were super excited with the result! Initially we made this product for ourselves and close friends, and today we are stoked to share this with you!
